

Project Name: Marketing Page
Tested By: Neetika Sachar
Date: 05/09/2025
Version: 1.0

Issue No	Description	Expected Behavior	Actual Behavior	Priority
1.	The heading “Our Premium Product” lacks sufficient visual distinction from the supporting paragraph.	The heading should be bold, larger than the paragraph, and act as a clear visual anchor.	The heading is only slightly larger and not bold, it blends in with paragraph text.	Medium

Issue Type: Styling inconsistency, UX

Suggested Fix: Increase font size and font-weight bold.

Screenshot:

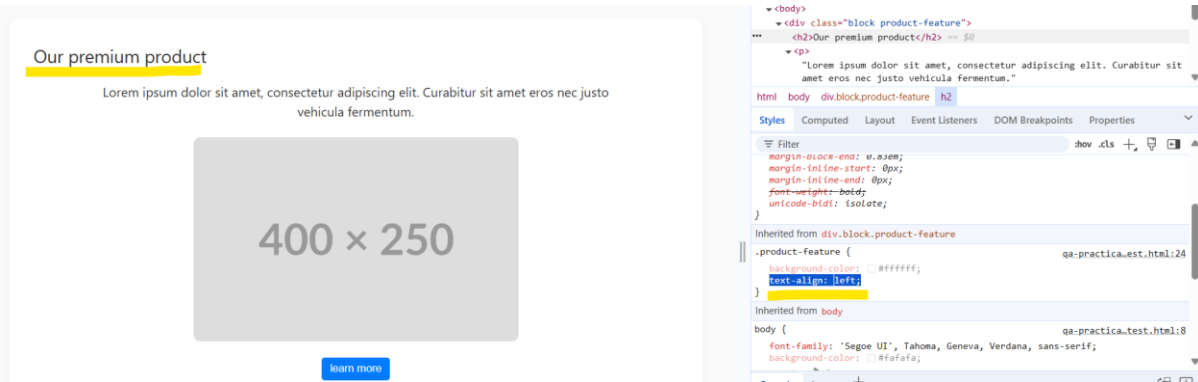

Issue No	Description	Expected Behavior	Actual Behavior	Priority
2.	Text alignment issue for “Our premium product”	All elements should be center aligned	Heading and paragraph are centered, but text-align left is applied at block level	Medium

Issue Type: Layout

Suggested Fix: Set text alignment to center

Screenshot:

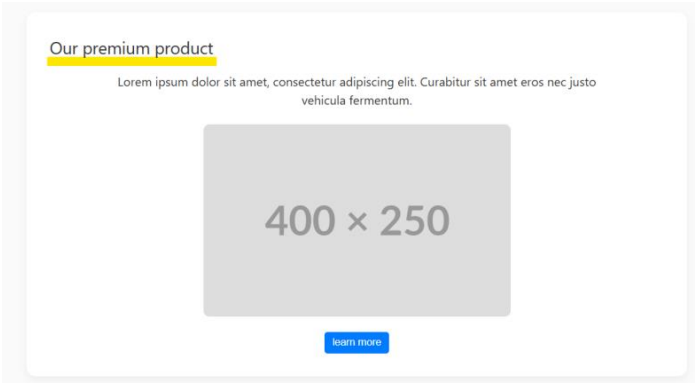

Issue No	Description	Expected Behavior	Actual Behavior	Priority
3.	Heading text does not match with the requirement	Heading should be exactly: "Our Premium Product"	Heading reads: "Our premium product" (lowercase "premium" & "product")	Medium

Issue Type: Layout

Suggested Fix: Change heading to "Our Premium Product" to match brief

Screenshot:

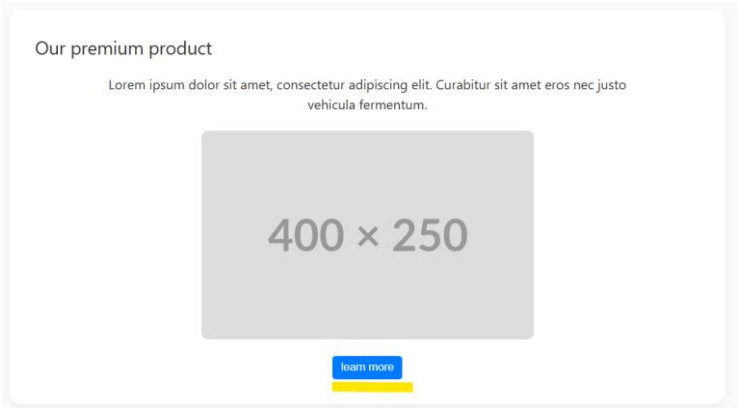

Issue No	Description	Expected Behavior	Actual Behavior	Priority
4.	Button label is lowercase	"Learn More"	Displays "learn more"	Low

Issue Type: Content

Suggested Fix: Capitalize to "Learn More"

Screenshot:

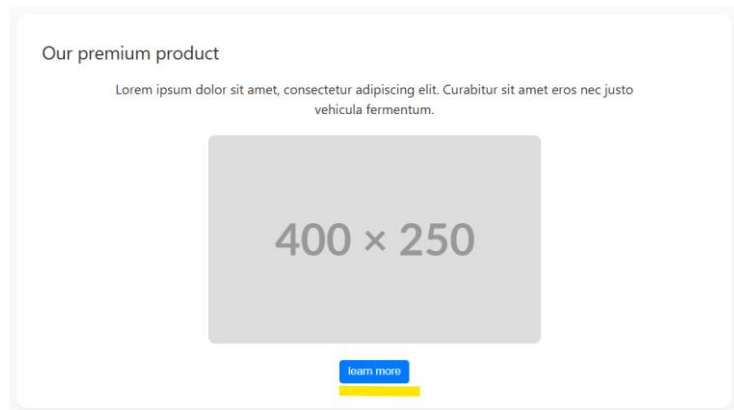

Issue No	Description	Expected Behavior	Actual Behavior	Priority
5.	Button has no visible focus style	Should show focus outline	Focus outline is suppressed (outline: none)	High

Issue Type: Accessibility – Focus state

Suggested Fix: Add visible focus style

Screenshot:

Issue No	Description	Expected Behavior	Actual Behavior	Priority
6.	The "Learn More" button appears styled but is not interactive — it doesn't trigger any action or navigation	The button should either - Trigger a relevant action (e.g., navigate to another page) Or be connected to a functional endpoint	The button does not have a click handler and doesn't link anywhere	High

Issue Type: Functionality

Suggested Fix: Link button to a relevant page

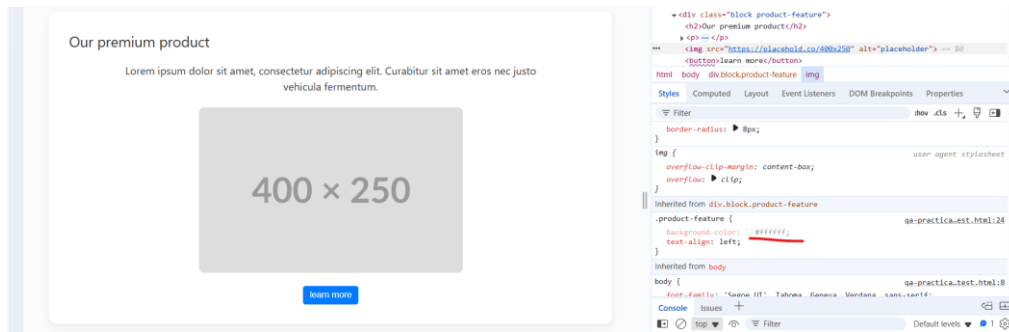

Screenshot: Not Provided

Issue No	Description	Expected Behavior	Actual Behavior	Priority
7.	Background colour does not match brief	Light grey background #f5f5f5	Uses white #ffffff	Medium

Issue Type: Design consistency

Suggested Fix: Change background to #f5f5f5.

Screenshot:

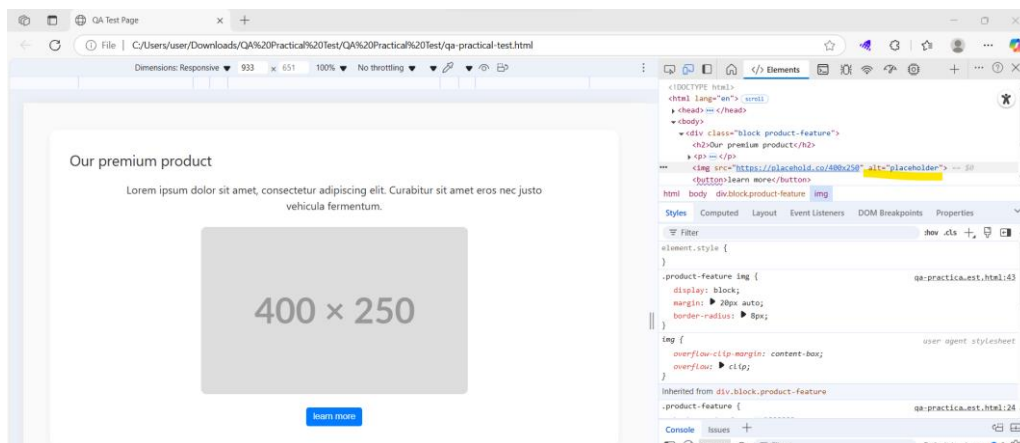

Issue No	Description	Expected Behavior	Actual Behavior	Priority
8.	Missing alt text for image	All images need descriptive alt text	Uses alt="placeholder" (vague)	Medium

Issue Type: Design consistency

Suggested Fix: Change background to #f5f5f5.

Screenshot:

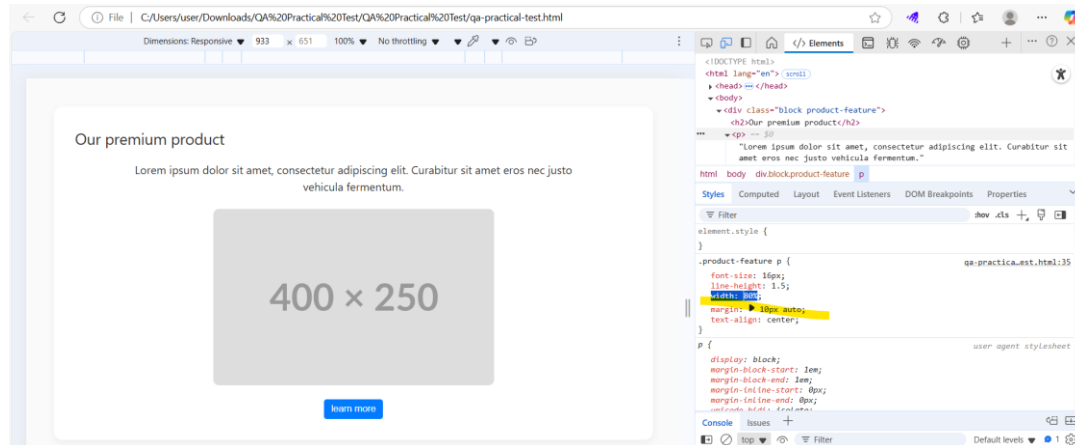

Issue No	Description	Expected Behavior	Actual Behavior	Priority
9.	Paragraph fixed width restricts layout	Should be readable and fluid	Uses width: 80%	Low

Issue Type: Responsive

Suggested Fix: Replace with max-width or remove width

Screenshot:

Issue No	Description	Expected Behavior	Actual Behavior	Priority
10.	No <main>, <h1> semantic, header tags in both blogs	Use of top-level heading and semantic structure	Starts from <h2>	Medium

Issue Type: Semantic HTML

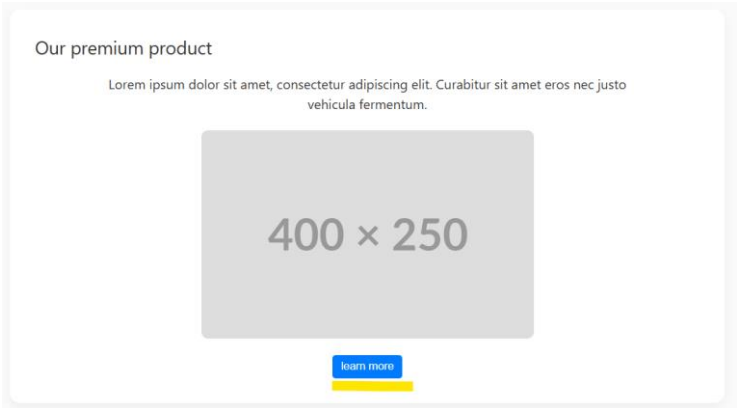

Suggested Fix: Wrap content in <main>, blocks in <section> and add <h1> with page title.

Screenshot: Not provided

Issue No	Description	Expected Behavior	Actual Behavior	Priority
11.	Button text contrast does not meet accessibility standards	Button text must have sufficient contrast against its background	White text on #007BFF background has a contrast ratio	Medium

Issue Type: Accessibility

Suggested Fix: Use a darker shade of blue or increase text weight/size for compliance

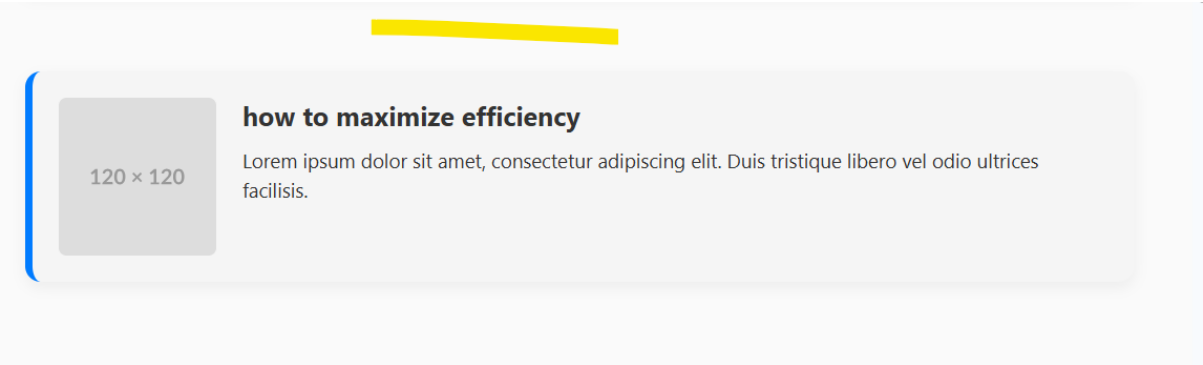

Issue No	Description	Expected Behavior	Actual Behavior	Priority
12.	Missing section heading	Should say "Latest from Our Blog"	No heading present	Medium

Issue Type: Content Missing

Suggested Fix: Add header for block 2

Screenshot:

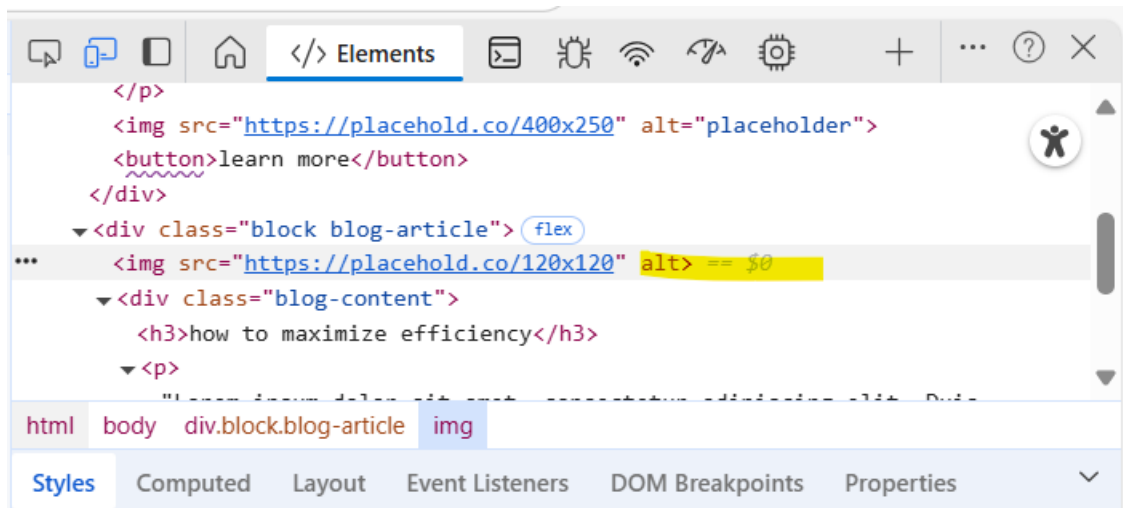

Issue No	Description	Expected Behavior	Actual Behavior	Priority
13.	Empty alt text on blog image	Alt text should be descriptive	Uses alt=""	Medium

Issue Type: Accessibility

Suggested Fix: Can use alt="Post thumbnail: How to Maximize Efficiency"

Screenshot:

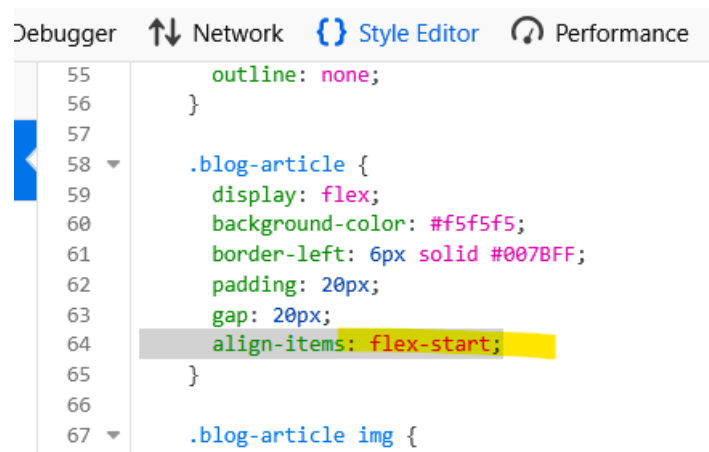

Issue No	Description	Expected Behavior	Actual Behavior	Priority
14.	The blog image and the accompanying text content are not vertically aligned as expected	Image and text should be vertically centered within the block	The layout uses align-items: flex-start, which aligns the image and text to the top , not the centre, resulting in visual imbalance.	Low

Issue Type: Layout

Suggested Fix: Change the containers align-items property

Screenshot:

Bonus Areas to Explore:

1. Semantic HTML Structure: The HTML uses only <div> elements for structure, and lacks <main>, <section>, <article>, or even a <h1> heading.
2. If the button is a placeholder, visually and programmatically mark it as disabled.
3. Avoid fixed width.
